

## Transport- and Storage Containers

## Transport- and Storage Containers

---

Transport and storage containers were specially developed for military applications. They comply with all MIL-standards and have an ergonomic design. The cases consist of a unique high-tensile aluminium compound that provides a lightweight container with natural impact resistance.

Modern production and ergonomic design offer users a high quality. The cases are available in three sizes which are adjusted to Euro pallet dimensions.

Available as standard sizes or specially designed for transport content, we offer transport and storage containers with many individual options such as drop handles, air equalization valves and humidity indicators as well as a wide range of surfaces and self-locking closures.

# Features and possibilities

- Transport and storage containers are available in the dimensions
  - 600mm x 400mm x 450mm (LxWxH)
  - 800mm x 600mm x 500mm (LxWxH)
  - 1200mm x 800mm x 400mm (LxWxH)
- Protection class IP65
- Stackable
- humidity display
- pressure compensation valve
- Air-transportable
- Ergonomic construction
- Lightweight construction (aluminium)
- Standard foaming is included in case
- Special foams available upon request
- HF shielding available

## The transport and storage containers are certified according to:

- MIL-STD 810F, comply with protection class IP65
- NATO - AEPP-3
- BS EN ISO 9227
- STANAG 4398
- IP65 according to IEC 60529
